DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-14, drawn to an optical device, classified in class 257, subclass 531.
- II. Claim 15-20, drawn to a method of manufacturing an optical device, classified in class 438, subclass 15+.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the semiconductor integrated circuit's protruding portion goes through a chemical mechanical polishing process but the protruding portion could be polished manually. Also in the instant case the semiconductor integrated circuit goes through a selectively removing process of a protective film, yet this step could be done by selective deposition. These two variations to the method process will still have the same device in the end.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor A Mandala Jr. whose telephone number is (703) 308-6560. The examiner can normally be reached on Monday through Thursday from 8am till 6pm.
